

Defender® SHOCK/CONTACT ALARM

A dual-function alarm that protects against forced entry by triggering a powerful 130dB siren when vibration is detected, or when a door or window is opened and the magnetic field is broken.

The vibration function can be disabled so the unit will only trigger when the door/window opens.

The alarm uses a 4 digit code and comes with a small solar panel that can extend battery life by up to 18 months.

Perfect for doors and windows around the home, shed or garage.
