

Defender® DX-500 WIRELESS PERIMETER KIT

An outdoor alarm system that protects the perimeter of properties and has an operating range of 150m.

Battery-powered, with a fully IP55 weatherproof sensor the kit contains one outdoor PIR sensor and one receiver unit (up to 50 sensors can be paired with the receiver). An additional pager receiver, with a convenient belt clip, and extra sensors are also available. Receivers have up to 50 different audio alerts with 4 levels of volume, with the additional covert option of vibration or flashing mode.

Perfect for use on driveways, gardens, construction sites and rural properties.
